Introduction

1. Purpose of the RFA Process

- 1.1 All telecommunications licences issued by the Pakistan Telecommunications Authority (“PTA”) subsequent to the De-Regulation Policy 2003 and the Mobile Cellular Policy 2004 provide for contribution by licensees to a Universal Service Fund (“USF”).
- 1.2 The purpose of this Request for Applications (“RFA”) is to invite holders of such licences (“USF Contributors”) to submit Proposals, either individually or as part of a consortium, for providing USF Optic Fiber Network connectivity to all unserved Towns/Union Councils for provision of USF OFC Services in “USF Areas” as per Schedule C in Pakistan pursuant to a 10 year USF Services and Subsidy Agreement.
- 1.3 This RFA is part of a universal service program initiated by the Government of Pakistan (“GoP”), which is aimed at increasing access to telecommunications networks and services in un-served and under-served areas of Pakistan in a manner consistent with fair competition, international best practices, and existing sector policies and GoP commitments.
- 1.4 GoP has created a not-for-profit federal Government owned and controlled Universal Service Fund company (“USFCo”) to administer the USF, including the process initiated by this RFA (“RFA Process”). It is GoP’s intent that USFCo apply part of the USF toward payment of subsidy (the “USF Subsidy”) to be paid pursuant to the USF Services and Subsidy Agreement to assist in meeting the costs of constructing and operating the USF Optic Optic Fiber Network in the USF Areas.
- 1.5 Further information on the proposed USF OFC Services, USF Optic Fiber Network and USF Areas is set out in this RFA.
- 1.6 It is the intention of GoP to act quickly to implement its policy of extending access to telecommunications networks and services in un-served and under-served areas in Pakistan.

2. Source of Funds

- 2.1 Pursuant to Section 33A of the Act, the sources of funding USF shall consist of
 - (a) grants made by the Federal Government and the Provincial Governments;
 - (b) prescribed contribution by licensees;
 - (c) sale proceeds from the auction of the right to use radio spectrum;
 - (d) loans obtained from the Federal Government; and
 - (e) grants and endowments received from other agencies.
- 2.2 Left Blank.
- 2.3 Left Blank.

3. Current Legal, Regulatory, and Market Regime

- 3.1 Before 1996, Pakistan’s telecommunications markets were governed by the *Telegraph Act, 1885* and *Wireless Telegraphy Act, 1993*. Most telecommunications services were provided by the GoP’s Telegraph and Telephone Department. That Department was converted into a statutory corporation in 1990 as the Pakistan Telecommunication Corporation (“PTC”) and later in 1996 it was converted into a public limited company Pakistan Telecommunication Company Limited (“PTCL”). Competitive mobile telephone service was launched in 1991. Payphone service was launched in 1993. But of these competitors, only PTC and then PTCL had a formal duty to serve cities, towns, villages and Muzas in all areas of Pakistan.
- 3.2 Additional mobile, Wireless Local Loop (WLL), fixed-line Local Loop (“LL”) and Long Distance International (“LDI”) licensing since 2004 has increased competition substantially.
- 3.3 The Mobile Cellular Policy (2004) and Pakistan Telecommunications (Re-organisation) (Amendment) Act, 2006 require that PTCL and all mobile licensees provide significant geographic coverage. Yet, in rural areas, teledensity remains very low. Making telecommunications services available country-wide is a GoP priority.
- 3.4 In a competitive sector, it is not appropriate to impose universal service obligations on a single operator. Accordingly, the *De-Regulation Policy (2003)* at section 5, the *Mobile Cellular Policy (2004)* at section 8, and the *Pakistan Telecommunications (Re-organisation) Act, 1996* at section 33A require that PTCL and all subsequent fixed and mobile licensees pay into the USF.
- 3.5 Persons who enter into a USF Services and Subsidy Agreement as a result of the RFA Process (“USF Service Providers”) will receive a subsidy payment from the USF to extend USF OFN connectivity to unserved Towns/Union Councils to provide USF Optic Fiber Services by using Renewable Energy Solutions as a source of power to these defined areas, thus facilitating increase in rural teledensity. The amount of the USF subsidy payment will be established in accordance sections 12 and 43 of this RFA. The subsidy payment will be made in one or more instalments, against identified Project Implementation Milestones, in accordance with the USF Services and Subsidy Agreement.
- 3.6 In addition to the Capex Subsidy, USF shall also provide “Opex Subsidy” for a maximum period of up to three years on a declining model basis (see 3.8 below). USF Opex Subsidy shall be payable on regular periodical basis starting from completion of each of the milestones as mentioned in Schedule D of USF Services and Subsidy Agreement.
- 3.7 USF will only be looking for the lowest bidder overall Subsidy (Capex + BTS Connectivity + Opex), and not breakup of USF OPEX Subsidy demanded.
- 3.8 All Applicants shall mention a lumpsum amount of Opex for three years (separately from the usual Capex Subsidy) in their Financial Proposal in appropriate field. This amount shall be equally split over three years to show “Yearly Opex” of the Applicant. Then the

Applicant in adjacent column shall mention the “Yearly Opex Subsidy” for each of the three years making sure that for first year the asked subsidy amount cannot exceed 75% of the “Yearly Opex”, for second year the asked subsidy amount cannot exceed 50%, and for third year the asked subsidy amount cannot exceed 25% (See Annex 1: USF Subsidy Proposal Form with this RFA for elaboration).

- 3.9 USF OPEX Subsidy for each of the Years i.e. One, Two and Three shall be paid in quarterly installments based on the audited OFC Section/Links in each Milestone. The quarterly installments shall start immediately after completion of each of the Milestones and issuance of Project Implementation Milestone Certification. The payment will be due after verification of Quarterly Reports submitted by SP in accordance with Section 9.01 of USF Services and Subsidy Agreement and in accordance with Schedule of the OPEX Payment Methodology in the following manner:
- (a) After completion of the First Milestone and issuance of Project Implementation Milestone Certification and verification of Quarterly Reports as per OPEX methodology, USF Service Provider shall be paid as quarterly installments of the First Year OPEX Subsidy for the number of audited OFC Sections/Links in the First Milestone. Second and Third year OPEX subsidy for the First Milestone shall be paid to the service provider in the same manner. Thus, over a period of three years (thirty-six (36) months), against First Milestone, USF Service Provider shall be paid twelve (12) quarterly installments in accordance with the number of OFC Sections/Links audited for the Milestone.
 - (b) Same process of payment of OPEX Subsidy shall be repeated for each subsequent Project Implementation Milestone, thus USF Service Provider shall get forty-eight (48) instalments covering entire amount of OPEX Subsidy for the Project.

4. **USF Policy**

- 4.1 The *Universal Service Fund Policy* (“USF Policy”) is the policy framework guiding the RFA Process. It sets out goals, objectives, and guidelines for using USF funding to meet certain basic telecommunication and ICT services needs in areas of Pakistan which would otherwise remain unserved.
- 4.2 The USF Policy’s goals include making voice telephony and Internet access data services available and affordable to progressively greater proportions of Pakistan’s rural population.
- 4.3 Left Blank.
- 4.4 The USF Policy will guide the actions of USFCo in administering the Universal Service Fund. That administration includes the use of the USF Services and Subsidy Agreement, with compliance monitoring and penalties for non-performance, including forfeiture of bank guarantees. Technological features of the USF Policy include technological neutrality, an emphasis on shared access points, and mandated infrastructure sharing to facilitate multiple operators in the same area. Economic features include capping USF service prices and a “negative auction” RFA Process to use bidding competition among

licensees to minimize the amount of any particular USF Subsidy, and to maximize overall benefits from the fund. Together, these features establish a USF regime to extend telecommunications services to rural locations in a sustainable manner consistent with fair competition.

5. **USF Coverage Requirements**

The geographic locations that are the subject of this RFA and related USF Subsidy (the “USF Areas”) are identified in detail in Schedule C of the USF Services and Subsidy Agreement enclosed as Annex 6. Applicants must demonstrate that the USF Optic Fiber Networks they propose provide USF OFC services to all of the un-served Towns/Union Councils and connectivity to number of BTSs identified in Schedule C of the USF Services and Subsidy Agreement as being mandatory for USF Optic Fiber Network and USF OFC Services.

6. **USF Service Requirements**

The Traffic Matrix (Bandwidth Capacities) for each Optic Fiber Node included in this Package to be provided by the successful Applicant selected pursuant to this RFA are identified in Schedules A and B of the USF Services and Subsidy Agreement enclosed as Annex 6.

7. **USF Contributors and Eligibility**

7.1 Persons whose Local Loop (“LL”) Wireless Local Loop (“WLL”), Long Distance and International (“LDI”) or Telecommunication Infrastructure Provider (“TIP”) Licence was issued after adoption of the *Deregulation Policy (2003)*, and persons whose mobile cellular licence was issued or renewed after adoption of the *Mobile Cellular Policy (2004)*, (collectively, “USF Contributors”) have an obligation to contribute 1.5% of annual gross revenues to the Universal Service Fund, less inter-operator fees and related payments mandated by the PTA or Frequency Allocation Board (“FAB”).

7.2 Any other licensee who has had its licence issued, re-issued or amended to include Universal Service Fund contribution payment requirements will, on satisfaction of those requirements, be recognized as a USF Contributor as well.

7.3 Eligibility to participate in the RFA process is limited to USF Contributors under the Universal Service Fund Rules, 2006 (the “Rules”)¹.

7.4 Rule 24(12) sets out the following further restriction:

*No single licensee may accumulate more than fifty per-cent of the total amount of USF subsidies awarded by the USF Company in multiple auctions. The period during which a licensee’s accumulation and proportion of USF subsidy amounts will be defined in guidelines or statements of auction procedures to be issued by the USF Company from time to time.*USFCo has developed guidelines under Rule 24(12) which are available at

¹ See Rule 24(12) of the USF Rules 2006, as amended.

USF website www.usf.org.pk. Applicants should consider the potential application of this restriction in considering their bidding strategy, particularly where multiple Packages are being offered.

8. **Tentative Time Schedule**

- 8.1 The tentative timetable for the RFA events, beginning with publication of the pre-auction notice, is set out in Annex 8 of RFA.

9. **Project Administration and Correspondence**

- 9.1 Nominated Contact for all correspondence relating to this RFA is provided in Annex 8 of this RFA:

Methodology for USF OFC Project OPEX Subsidy Confirmation

1. Preamble

The objective of this document is to present the Monitoring Methodology for OPEX disbursement to verify that Service Providers (SPs) are meeting their contractual obligations of USF Services and Subsidy Agreement (SSA) regarding OPEX claim.

Schedule D of the SSA defines payment mode for OPEX subsidy.

2. Methodology for OPEX Subsidy disbursement

Service Provider's (SP) NOC/NMS will be visited along with SP representative to obtain the required NOC data, directly from NOC terminal/database. NOC data will be collected from SP NOC on monthly basis, for all USF sections/links/nodes, based on KPI's listed below.

NOC data which will be collected includes the following but not limited to:

- a) System generated reports and analysis:
 - Topology/Connectivity Diagram (mentioning interfaces providing connectivity to BTS)
 - Unplanned Outage details of USF OFC Network (Sections/Links/Nodes) not limited to Downtime, Uptime, Duration, Reasons and RCA (Availability trends)
 - Traffic and BW allocation and utilization logs (Provisioning of MRTG graphs)
 - Fault logs & Active alarms
 - Cross-connect detail with client info/tag
 - Interface-wise launch power & optical RX levels
 - NMS extracted OTDR traces
 - NMS extracted backups
 - Inventory details (TELCO)
 - Provisioning of L-14 diagram to track repair work of OFC sections
 - Details of used and unused OFC pairs
- b) The required data shall be submitted in agreed formats (other formats should be intimated to USF Company and a prior approval taken before submission of data).
- c) Non-provision of the required data in required format in any of the subsequent quarters will result in a corresponding payment deduction.
- d) A field visit may also be carried out if required to verify the network statistics.

2.1. System generated logs for calculation of downtime

The Service Provider shall ensure that system generated data portraying downtime status of all sections/links/nodes/services etc. of USF OFC Project pertaining to the Milestone of the quarter for which OPEX subsidy is being claimed is provided to USF QAM department.

These reports shall include but not limited to attributes listed above for which outage duration of the OPEX quarter in question would be calculated based on USF OFC Network & Services availability data. All system generated data is to be saved monthly on 1st day of each month for lasted month. If there are system limitations in data extraction like data truncation, buffer size capacity issues or otherwise, SP shall make sure to extract and submit data twice a month (15th day of ongoing month and 1st day of next). The data shall be archived to be accessible during the quarter in question and thereafter for a period of thirty-six months, till validity of OPEX subsidy duration.

2.2. OPEX Subsidy Deduction Calculation

For the case of OPEX subsidy for OFC Network, if the cumulative downtime/outage in days of Node exceeds two (02) days in a quarter for which the OPEX Subsidy is being given, USF Co shall be entitled to deduct proportionate amount on per Node per day basis, on number of days exceeding two (02), from the current installment of OPEX Subsidy. This includes, but is not limited to, the Node isolation due to Fiber outage. The method of calculation of per Node per day shall be to divide the OPEX subsidy for OFC Network of that quarter by the total number of Nodes and then by the number of days in that quarter.

For the case of OPEX subsidy for BTS Connectivity, Per BTS connectivity outage will be determined by calculating cumulative downtime/outage of an interface/port of the Node, providing connectivity to BTS, exceeds two (02) days in a quarter for which the OPEX Subsidy is being given, USF Co shall be entitled to deduct proportionate amount on per BTS per day basis, on number of days exceeding two (02), from the current installment of OPEX Subsidy. The method of calculation of per BTS per-day shall be to divide the OPEX subsidy for BTS Connectivity of that quarter by the total number of BTS connected sites and then by the number of days in that quarter.

In addition, USF will have the right to verify and validate the KPIs and Statistics provided. SP will be requested to provide support in Root Cause Analysis, where requested.

Formula details for both OPEX cases are given below:

OFC Network OPEX Deduction:

$$\begin{aligned} & \text{OPEX Per Node Per Day} \\ & = \left[\frac{\text{Total OPEX subsidy for OFC Network of a Quarter in MS (X)}}{\text{Total number of nodes}} \right] \div \text{No. of Days in Quarter} \end{aligned}$$

Per Node Deduction = Per node outage in days exceeding 02 × OPEX Per Node Per Day

Total Node OPEX Deduction = Sum of all Per Node Deductions of a Quarter in MS (X)

BTS Connectivity OPEX Deduction:

$$\begin{aligned} & \text{OPEX Per BTS Per Day} \\ & = \left[\frac{\text{Total OPEX subsidy for BTS Connectivity of a Quarter in MS (5)}}{\text{Total number of BTS in MS (5)}} \right] \\ & \div \text{No. of Days in Quarter} \end{aligned}$$

Per BTS Deduction = Per BTS connectivity outage in days exceeding 02 × OPEX Per BTS Per Day

Total BTS connectivity OPEX Deduction = Sum of all Per BTS Deductions of a Quarter in MS (5)

2.3. System generated logs and traffic stats for USF OFC Networks

NOC data which will be collected includes the following but not limited to:

- System generated reports will be analyzed for KPI(s) listed above in section 2.

Deductions in OPEX subsidy shall be calculated on the basis of system generated reports for the OPEX duration as given in Schedule D of the SSA.

2.4. Inspection of Nodes & Fiber

USF will regularly perform monitoring audits of the OFC network for which SP shall arrange a separate visit to a sample of the sections/nodes, for USF resource or associated partner, as mentioned in Schedule C. The following but not limited to, will be checked:

- Sections/Nodes health check.
- Verification of installed BOQ as per contract
- Verification of operational status of connectivity/services/BOQ/nodes as per contract.
- Ensuring that there are no service affecting alarms on the nodes.

2.5. NMS / NOC Visit

NMS / NOC visit will be conducted at the end of Technical Audit of a Milestone or Monitoring visit in addition to monthly visits, in which not limited to the following will be collected.

- NMS visibility status of each USF OFC sections/nodes.
- Operational status of USF OFC sections/nodes/services and alarm status shall be checked.

- If major alarms exist, these shall be conveyed to the Service Provider who shall rectify these alarms and send a report to USF or his designated officer.
- These snags shall be checked during subsequent monitoring visits.

3. Reporting

OPEX quarter will start immediately after completion of each of the Milestone and issuance of Project Implementation Milestone Certification. Once the OPEX quarter is due, OPEX quarterly report shall be submitted to USF within 30 days of quarter due date. Report shall contain data mentioned in section 2 above. In case any outage minutes are claimed under FM/Node inaccessibility, they shall be clearly mentioned in the report together with the duration and inaccessibility certificates validated by District administration/ relevant authorities. The report along with all supporting documents mentioned in Section 2 and sub clauses shall form part of OPEX payment file/case

In case of outage of an interface/port, providing connectivity to BTS, occurs due to unavailability of BTS site, for reasons beyond the control of USF SP, this shall be clearly mentioned in the report together with duration and supporting evidence.
